

PANCHAR

Why Choose Panchar?

Addressing a critical gap: Panchar fills a vital need by offering reliable, 24/7 roadside assistance, reducing stress and minimizing downtime during vehicle breakdowns.

Leveraging technology: Our digital platform provides easy access to professional help anytime, offering customers the convenience and speed they require.

Building trust and loyalty: By solving urgent vehicle issues efficiently, Panchar fosters long-term customer loyalty and establishes itself as a dependable, sustainable business.

What is Panchar?

- **Comprehensive vehicle assistance service:** Panchar offers 24/7 roadside support for common vehicle emergencies, including:
Tire changes Fuel delivery Towing Battery jump-starts and more
- **User-friendly digital platform:** Our platform enables customers to quickly request assistance, ensuring safety and minimizing disruptions during their journey.
- **Trusted partner on the road:** Panchar aims to be the go-to service drivers rely on for professional, swift help during emergencies, combining fast response times with expert care.

How Panchar operates

- **On-demand roadside assistance:** Customers can use our digital platform to request 24/7 help, addressing unexpected breakdowns and ensuring they get back on the road quickly and safely.
- **Revenue model:**
 - Service fees:** Charges for individual assistance requests.
 - Subscription plans:** Options for frequent users seeking continued roadside support.
 - Partnerships:** Collaborations with insurance companies and automotive service providers to expand our offerings and reach.

Problem and Opportunity

Category	Details
CONTEXT	The problem occurs when drivers face sudden vehicle issues such as flat tires, breakdowns, or running out of fuel, especially in remote or unfamiliar areas.
PROBLEM	The root cause is a lack of accessible, reliable, and prompt roadside assistance when and where it is needed the most.
ALTERNATIVES	Customers rely on calling friends/family, searching for local mechanics, or waiting for generic roadside assistance, which can be slow and unpredictable.

Category	Details
CUSTOMERS	The problem is most often faced by everyday drivers, particularly long-distance travelers, commuters, and those in areas with limited service options.
EMOTIONAL IMPACT	Customers feel anxious, stressed, and vulnerable when they are stranded, leading to frustration and a sense of helplessness.
ALTERNATIVE SHORTCOMINGS	Existing alternatives often involve long wait times, lack of transparency in service availability, and inconsistent pricing, adding to customer stress.
QUANTIFIABLE IMPACT	Reduced downtime for customers (e.g., waiting time cut by 50%), increased service reliability, and higher customer satisfaction ratings (90%+).

Problem Interviews And Surveys Results

- **Customers Interviewed:**

15 individuals, including campus day scholars, vehicle users, and some outsiders.

- **Interview Mode:**

In-person meetings, phone calls, and opinion polls in chat groups.

- **Problem Acknowledgment:**

9 out of 15 (60%) agreed on the need for a solution, mainly teenagers and younger people.

- **No Solution Needed:**

6 out of 15 (40%) felt a new solution wasn't necessary, mostly those less inclined toward technology.

Market Overview

- **TAM (Total Addressable Market):**

\$1 billion annual market in India, based on 300 million registered vehicles needing services like towing, tire changes, and fuel delivery.

- **SAM (Serviceable Available Market):**

50 million vehicle owners in high-traffic urban areas (e.g., Bangalore, Mumbai, Delhi) with high demand for roadside assistance.

- **Serviceable Obtainable Market (SOM)**

Targets 1% of the urban vehicle owners in high-demand cities like Bangalore, Mumbai, and Delhi, aiming for 500,000 customers and **\$25 million** in annual revenue within the first 1-2 years.

Customer Persona

Age: 18–35-Year-Old

Occupation: Students, young professionals, daily commuter

Location: Urban and semi-urban areas

Personality:

Tech-savvy, Reliability-seeker,
Time-conscious

Goals:

- Access quick roadside assistance
- Minimize delays during travel

Frustrations:

- Inconvenience during unexpected breakdowns
- Limited options for immediate help

Motivations:

- Fast, hassle-free roadside assistance.
- Transparent pricing and trustworthy service

Bio:

Frequently drives in the city, uses the vehicle for commuting to work or college. Values efficiency and seeks services that are quick, affordable, and easy to access through mobile platforms

Value Proposition

Customer Profile

Solution

MVP Validation

What is your MVP

Roadside assistance app for quick vehicle support and repair.

Test Details:

How long will we test this MVP? 1 month

Target Audience & Quantity

Local drivers; target: 500 users

How will we reach the audience?

Social media ads, partnerships with local garages

Conclusion:

☐ Persevere

☐ Pivot

☒ Not Conclusive

Results of Test:

Did enough customers buy? Why or why not?

Yes, demand for immediate roadside support is high.

Did customers pay the expected price? Why or why not?

Mostly, but some users found the price slightly high.

Did customers return or show interest in returning? Why or why not?

Yes, due to quick response time and reliable service.

Did customers recommend the product? Why or why not?

Yes, positive feedback on social media and through referrals.

Realizations / Insights:

Potential to expand service options and consider slight price adjustments.

Next Steps:

Adjust pricing, strengthen marketing efforts, and gather more feedback on new features.

Funding Plan for Panchar

1. How much funds are required to reach the next level of the venture?

- Amount Required: ₹10,00,000
- This amount will cover initial operational, marketing, and development costs for the first year, enabling Panchar to establish a customer base and brand recognition.

2. How much have been bootstrapped? If not, why?

- Bootstrapped Amount: ₹2,00,000
- Reason: Initial funds from founders and team members cover basic setup, including website development, legal registration, and initial marketing.

3. How much can be bootstrapped?

- Estimated Additional Bootstrapped Amount: ₹1,00,000
- Founders and team members can contribute this amount to help with early operational expenses until external funding is secured.

4. How much external funding is required? If not, why?

- External Funding Needed: ₹7,00,000
- Reason: To accelerate growth and achieve the business's early objectives, such as expanding service coverage, improving the website, and conducting marketing campaigns.
